

Investigation into the Fact-Finding Process of Fraudulent Activities
in NOx Emissions Verification Tests

With regard to the “Investigation into the Fact-Finding Process of Fraudulent Activities in NOx Emissions Verification Tests,” which the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) instructed us to investigate on July 5, 2024, we have conducted an internal inspection and reported the results to MLIT today.

[Inspection Result]

With an internal inspection result, we have not found any inappropriate results which are included NOx inspection and data processing for our products based on NOx emission inspection by Law relating to the Prevention of Marine Pollution and Maritime Disaster.

During inspection, we have found some improvement points from a view of Quality Management.
We make constant improvements for Quality Management.
